Project Features

- Environment (E)
  - Server (E1)
    - Connection (E1.1)
      - Web (E1.1.1)
      - FTP (E1.1.2)
      - SQL (E1.1.3)
    - TEsk Execution (E1.2)
    - TEsk Configuration (1.3)
  - Data (2)
    - Integrity (E2.1)
    - Availability (E2.2)
    - Durability (E2.3)
- Architecture (A)
  - Security (A1)
    - Interface (A1.1)
      - User Authentication (A1.1.1)
      - Cryptography (A1.1.1.1)
      - Digital Certificates (A1.1.1.2)
      - Tokens (A1.1.1.3)
      - Data Availability (A1.1.2)
    - Persistence (at the database level) (A1.2)
      - Data Integrity (A1.2.1)
  - Efficiency (A2)
    - Performance (A2.1)
      - Simultaneous Access (A2.1.1)
      - Operational Performance (A2.1.2)
    - Size (A2.2)
      - Table Size (A2.2.1)
      - Memory Constraints (A2.2.2)
      - Cache Requirement (A2.2.3)
- Integration (I)
  - Legacy (I1)
    - Functionality Access (I1.1)
    - Communication Methods (I1.2)
    - Data Exchange (I1.3)
  - Third-Party (I2)
    - Services (I2.1)
      - APIs (I2.1.1)
      - Frameworks (I2.1.2)
      - Hybrid Development (I2.1.2.1)

            - Ionic (I2.1.2.1.1)
            - Electron (I2.1.2.1.2)
            - Security (I2.1.2.2)
            - JWT (I2.1.2.2.1)
            - Auth (I2.1.2.2.2)
        * Configuration (I2.2)
            - Libraries (I2.2.1)
            - Requests (I2.2.1.1)
            - Persistence (I2.2.1.2)
            - Communication (I2.2.1.3)

- Method (M)
    - Technique (M1)
        * Train Predictive Model (M1.1)
        * Code Blockchain Network (M1.2)
            - Public (M1.2.1)
            - Private (M1.2.2)
            - Consortium (M1.2.3)
        * Implement AI Algorithm (M1.3)
    - Validation (M2)
        * Client Data Requirement (M2.1)
        * System Deployment (M2.2)
